

Essilor Solutions

Imagine the possibilities...

Imagine a centralized system that would link together all the tools you use on a regular basis. Imagine entering your data only once to feed your information flow to Visioffice, VisionWare, Essibox, Mr Blue and e-TESS.

Essilor Solutions now offers you this possibility! Plus you can integrate tools step by step at your own pace.

Essilor Solutions: optimizing overall practice organization and the quality of your service.

Visioffice

- Universal measuring instrument
- Frame selection interface
- Software providing sales support

VisionWare

- Complete practice management software
- Possibility of exchanging electronic data with your suppliers and provincial medical care
- Increased practice effectiveness and efficiency

Essibox

- Data exchange platform
- Workshop management optimization
- Possibility of multi-site organization or centralized edging

Mr Blue

- Hybrid edging system
- Conventional edging and milling of more complex lenses
- High-curve lens bevel profile design
- Photo tracing of demo lenses including drilled holes positioning

e-TESS

- High accuracy tracer
- Tracing of low B measurement frames and highly curved frames
- Shape alteration on integrated screen
